

Overview:

Help prevent slips, trips and falls with Rain for Rent's SolidGround Traction Mats. These durable mats provide a stable surface for increased traction on muddy or sandy soil and protect landscapes from damage. The 12mm thick recyclable polyethylene mats are easy to transport and simple to assemble, reducing your installation time and transportation costs.

Features and Benefits:

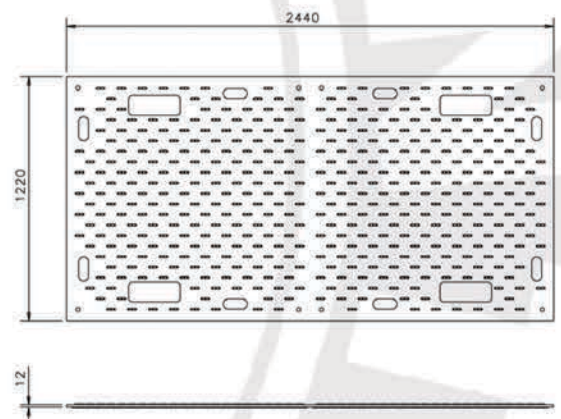

- Portable landscape protection and traction
- Provide stability and traction on sandy and muddy soil
- Prevent puncture and damage to Spillguards
- Create temporary walkways, roadways and platforms - construction sites, parks, and special events
- Create temporary hydro / sand blast pads
- Provide superior traction in any environment
- Do not retain water
- Are unbreakable - no need to replace a mat after a heavy load passes through
- Do not delaminate - the Traction Mats are solid, moulded pieces
- Easy set up and take down
- Prevent costly damage to landscapes during projects
- Avoid unwieldy steep plates
- Reduce cost of one-time use, destructable plywood
- No equipment necessary for handling

Specification:

- Panel Dimension: 2440 x 1220 x 12 mm
- Weight: 32 kg per mat
- Withstand up to 80 tonnes load
- Tested in extreme cold and heat
- Cleat designs for pedestrians and vehicle traffic
- Water and chemical resistant

Accessories:

- Spillguards
